

Marin forsopling – kan det løses?

Eirik Kanck
Markeds- og innovasjonsvarlig
eSEA Marine

An aerial photograph of a vast, flat, white landscape, likely a salt flat or a frozen body of water, under a bright sun. The sun is positioned in the upper center, creating a strong lens flare and illuminating the scene. The horizon is visible in the distance, and the overall color palette is dominated by white and light blue. The text 'MARIN FORSØPLING - KAN DET LØSES?' is overlaid in the center of the image.

MARIN FORSØPLING - KAN DET LØSES?

Marine litter

IT IS A PROBLEM

100 000 marine mammals killed every year

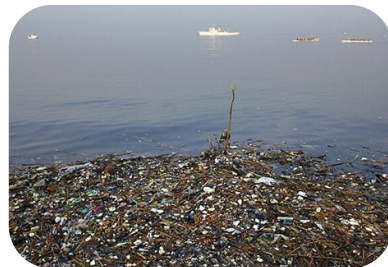

Plastic microparticles impacting the food chain

Suffocating sea beds

Physical threat to mankind

5 continents of waste formed in the oceans

Marine traffic obstructed

94% of the litter sink and remain on the seabed

*source: Norwegian Environment Agency

HVA KAN
AVFALLSBRANSJEN
BIDRA VIDERE MED?

- 
- An aerial photograph of a city harbor, likely Sydney, Australia. The Sydney Opera House is prominent in the foreground, situated on a peninsula. A large steel bridge spans across the water in the middle ground. The city skyline is visible in the background under a clear blue sky.
